

Download the resources you require to join the exams

You must make sure that all these files are installed and configured properly before you join the exam. With this software, you also require a stable internet connection and a webcam. To download the exam guideline [click here](#).

Step 1: Download Safe Exam Browser

This is the browser you will use to take the exams. Once the browser is installed, you must install the configuration file to visit our student portal.

Windows users, please [click here](#) to download.

Mac users, please [click here](#) to download.

Step 2: Configure Safe Exam Browser

Once you install the Safe Exam Browser (SEB), down the configuration file and double click it. It will automatically open the safe exam browser and ask for a password. The current password is “onlineexam”. Once the configuration file is done you can check if the Safe Exam Browser (SEB) works fine by restarting the application. It should load to the student portal.

[Click here](#) to download the configuration file.

Step 3: Download Zoom

Before you start the exam, you must log in to the correct exam room in Zoom and share your webcam. If you do not do this your attempt will not be counted. So, before you start the Safe Exam Browser (SEB), log in to Zoom first. You will receive the exam link by email one day before the exam.
